Full-Stack Developer Co-op Candidate | Analytical •

Detail-Oriented PROFILE

-
- Software Engineering Technology (AI) student seeking **Winter 2027 co-op** (start date January 20, 2027) as a FullStack Developer
 - Built a full-stack ASP.NET Core API backed by SQL Server with a normalized relational schema
 - Proficient in C#, SQL, and Python; strong analytical problem-solving and quick, self-directed learning

QUALIFICATIONS

-
- Engineered **RESTful ASP.NET Core Web API** using Entity Framework Core and SQL Server
 - Designed a **normalized three-table database schema** for a relational data model
 - Taught myself **SQL** alongside coursework using a structured self-study plan
 - Learning **React, Node.js, and Express** in Web Application Development course

Soft Skills: Analytical problem-solving | Self-directed learning | Collaboration | Attention to detail **Languages:** C#, Python, JavaScript, SQL

Frameworks: ASP.NET Core, Entity Framework Core, FastAPI, scikit-learn, React, Node.js/Express

Tools: SQL Server, Git/GitHub, Linux command line, Bash

EDUCATION

Ontario College Advanced Diploma, Software Engineering Technology (AI) | Graduation Date | Expected April 2028
Centennial College, Toronto, ON

Relevant Courses: Programming 2 (C#/OOP), Web Application Development, Unix/Linux Operating Systems, JavaScript Programming, Python Programming

RELEVANT EXPERIENCE – TECHNICAL PROJECTS

GradeTrackerApi – Personal Project, ASP.NET Core Web API | Jan 2026 – Present

- Engineering a RESTful API with Entity Framework Core and SQL Server
- Designing a normalized three-table database schema
- Architecting Azure cloud deployment to extend infrastructure skills

job-tracker-api – Personal Project, Python/FastAPI | Sep 2026 – Present

- Building a FastAPI backend with SQLAlchemy to track job applications through a relational SQL database
- Implementing automated testing with pytest and continuous integration via GitHub Actions
- Documenting setup and usage in a project README for reproducibility
