Junior Full-Stack Developer | Co-op Candidate, Winter 2027

PROFILE

Software Engineering Technology (AI) student seeking a Winter 2027 co-op (start January 20, 2027) as a junior full-stack developer. I build REST APIs with automated tests and CI, and I am adding React and Node/Express to my toolkit.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C#, SQL

Back end: FastAPI, ASP.NET Core, Entity Framework Core, SQLAlchemy, REST API design, Pydantic

Front end: React, React Router, Vite, HTML, CSS

Tools: Git/GitHub, GitHub Actions (CI), pytest, SQLite, SQL Server, Swagger/OpenAPI, Linux command line

Currently learning: React and Node.js/Express (Web Application Development), MongoDB, JWT authentication, building a React front end with an AI chat feature for my job tracker API

PROJECTS

Job Application Tracker API | *Python, FastAPI, SQLAlchemy, SQLite* Sep 2026 – Present

- Built a REST API (create, list, view, update, delete) with FastAPI and SQLAlchemy 2 on a relational SQLite database
- Validated input with Pydantic (empty fields and unknown statuses return 422); added partial updates (PATCH) and filtering by status
- Wrote 8 automated pytest tests using an in-memory test database; run on every push with GitHub Actions CI
- Documented endpoints in the README and auto-generated Swagger docs; public on GitHub

Personal Portfolio Website | *React, Vite, React Router* Oct 2026

- Built a multi-page React site with client-side routing, deployed live on Netlify
- Next: Node/Express back end and a user-login system as part of Web Application Development

GradeTrackerApi | *C#, ASP.NET Core, Entity Framework Core* Jan 2026 – Present

- Built a RESTful ASP.NET Core Web API with Entity Framework Core and a normalized three-table relational schema
- Added a JavaScript front end and shell-script setup automation (code available on request)

Java Transaction Engine | *Java, JDBC, SQLite* 2026

- Built a transaction-processing engine in Java that stores transactions in SQLite through JDBC
- Processed transactions concurrently with an ExecutorService thread pool
- Public on GitHub

EDUCATION

Ontario College Advanced Diploma, Software Engineering Technology (AI) – Co-op Expected April 2028

Centennial College, Toronto, ON

Relevant courses: Programming 2 (C#/OOP), Web Application Development, JavaScript Programming, Python Programming, Unix/Linux Operating Systems

WORK EXPERIENCE

Customer Service Associate (Self-Checkout) | *Independent grocery store* 2018 – 2021

- Resolved scanning and payment errors for customers across multiple self-checkout stations at once
- Stayed calm and clear when helping frustrated customers, and followed store rules on age-restricted sales
